PROFILE

Motivated Information Technology graduate with a background in web development, system development, and data management. Experienced in creating web-based solutions with a focus on usability, clear navigation, and practical user needs. Skilled in React, JavaScript, HTML, CSS, Microsoft Office, data entry, and basic databases. Interested in user experience, usability testing, and improving digital products through user feedback and problem-solving. A quick learner who works well independently and as part of a team.

PROJECTS

VoteSphere AI — Full-Stack Voting System

- Designed and developed a web-based voting platform focused on providing a clear and accessible user experience.
- Created user registration, verification, voting, and confirmation flows.
- Designed dashboards and navigation for different types of users.
- Identified opportunities to simplify user interactions and improve clarity throughout the voting process.
- Built with React, JavaScript, Node.js, and PostgreSQL.

Appointment Booking System

- Designed and developed an online appointment booking system.
- Created user flows for registration, service/provider selection, availability, and booking.
- Focused on making the booking process simple and understandable for users.
- Developed responsive interfaces using React and web technologies.

Web Development Projects

- Designed and developed responsive websites and web interfaces.
- Worked on improving layouts, navigation, and user interactions.
- Collaborated with others while developing and refining web projects.

WORK EXPERIENCE

M&S Company Ltd — IT Department *2022 – 2024*

- Supported computer-based and IT-related activities within the company.
